USDA Certified Organic

Recommended **with caveats** due to the highly variable way the standards are implemented.

- Hens are uncaged inside barns or houses, with outdoor access required.
- Dairy cows on pasture for at least 120 days a year.
- No hormones or antibiotics.
- Diet free from synthetic herbicides, pesticides, or fertilizers.

Inconsistent implementation of standards. For example, some producers may not provide birds meaningful access to the outdoors.

<- Folds in Folds out ->

Certified Naturally Grown

Recommended **with caveats** as an alternative to USDA Organic. This label offers farmers lower certification fees and less paperwork compared to USDA Organic.

- Standards are very similar to USDA Organic with tighter requirements for access to pasture.
- No hormones or antibiotics.
- Diet free from synthetic herbicides, pesticides, or fertilizers.

Audits are done by other CNG farmers or volunteers, not a third-party inspector.
